

ORBIT OBBS STAINLESS

ORBIT OBBS Stainless are strictly manufactured according to BS 5315 and has British Standard Kitemark™ approval. It is design to optimize free torque and Destructive Torque. With thick high tensile band, it provide greater band tension for high seal ability. Smooth inner band provides best hose surface protection. ORBIT OBBS stainless steel hose clamps are available in various type of material for different application from industrial use to marine application. Material are available from 430 stainless steel 304 18/8 stainless steel to 316 stainless steel.
