

03110 Electricians Knife, Curved Blade 70mm

◀ After folding

- It is made of special hard steel containing manganese and thus boasts good toughness
- The blade hardness is greater than 52HRC (Rockwell hardness), achieving high durability and strong cutting power
- The handle is made of imported rosewood, achieving aesthetic appearance and comfortable operation

Note

- Please keep the blade clean and dry after operation
- Keep blade away from saline environments to prevent rusting
- Please preserve the product with antirust paint before putting it into a long-term stoppage
- This product is uninsulated and thus shall never be operated with power on, for fear of an accident
- The handle is made of wood and thus shall never be knocked with force, for fear of cracking
